6 LESS MANPOWER
Less time required for applying, cleaning and disposal of Strohfelder®

7 SAVE MONEY
You will get obvious economic benefits by using Strohfelder® beddings

8 AUSTRIAN QUALITY
Fast deliveries straight from Strohfelder® warehouse

Strohfelder® Platinum Original is made from 100% pure wheat straw, Strohfelder® Brilliant from soft and fluffy wood fibres. All Strohfelder® beddings do not contain neither chemical, nor natural additives, such as perfumes, extracts, binding agents or similar. Attention! The aforesaid additives may develop allergic reactions in animals and people!

Strohfelder® professional bedding products are virtually dust free. All dust and smallest particles that do not meet our highest standards of product quality, are removed from the bedding during production and packaging stages.

Strohfelder® beddings are heat-treated at temperatures reaching 120° C, which makes them one of the safest litters on the market. Also, possible mould, fungus, salmonella, coli bacteria and other risk factors are eliminated from the product during the heat treatment. Furthermore, high temperature treatment ensures low level of moisture in our products (~8%), resulting in better performance of Strohfelder® bedding compared to other manufacturers' beddings with moisture levels exceeding 10% up to 14%.

Strohfelder® professional bedding absorbs more than 400% of moisture compared to its own weight.

Strohfelder® bedding eliminates ammonia and absorbs its odour, providing greatly improved and fresh indoor climate.

Strohfelder® bedding is easy and economical to use- you will need significantly less space to store the litter, less working hours to spread it and to keep it clean in the future.

Used bedding is an excellent fertilizer for fields, orchards, meadows or as raw material for biogas plants.

The highest quality and purity of Strohfelder® products is guaranteed by Austrian precise and continuous product development and deep knowledge of litter industry.

BRILLIANT
innovative bedding
from wood fibres

PLATINUM ORIGINAL
innovative
straw based bedding

Strohfelder® Brilliant bedding is made from soft and fluffy wood fibres. Due to perfectly shaped particles, their size and appealing light colour, **Brilliant is the first choice bedding for stables, where aesthetics are valued the most. Brilliant bedding is soft, fluffy and dust-free.** In order to reach the maximum effectiveness of its properties, light watering of bedding is recommended before the first use. Horses do not eat Strohfelder® Brilliant bedding.

By using Strohfelder® Brilliant litter, you will avoid slippery or wet floors in your stable, **which in turn will reduce the risks of horses' injuries.** No slippery floors means **no joint injuries or other damage to your horses.**

Strohfelder® Brilliant is a very popular litter, because it is very easily handled and requires less efforts in application and cleaning. Also, Strohfelder® Brilliant improves the heat insulation of the floor, which considerably reduces the risk of your horses getting cold or stretching their muscles.

Strohfelder® Brilliant will not cause allergies to your horse, unlike other beddings, such as wood shavings, because there is absolutely no gum turpentine in Strohfelder® Brilliant , which could hurt the eyes of your animals and irritate their respiratory tract.

Strohfelder® Brilliant eliminates ammonia and absorbs its odour, providing greatly improved and fresh climate in your stables. Also, **Strohfelder® Brilliant will save your time, because considerably less time and effort is required for spreading, cleaning or removing Brilliant compared to other old-fashioned beddings. Naturally, the amount of waste will be reduced by many times.** Strohfelder® Brilliant decomposes during 6-7 months after its use. You will no longer need to rip, chop or kick your frozen bedding before its use, as Brilliant never freezes and is always ready for use. **Remember, that your horses will be healthier and happier if you give them the opportunity to enjoy the advantages of Brilliant bedding.** And even more importantly, if you change your old- fashioned bedding to Strohfelder® Brilliant , **you will save not only your time, but your money as well!**

Nachdem ich auf Strohfelder® Natur-Einstreu umgestellt habe, gehören Atemwegserkrankungen der Vergangenheit an und meine Pferde bringen Höchstleistungen wie noch nie

When we started using Strohfelder® bedding, our horses stopped suffering from allergies and began to win.

Helmuth Schultz / Stuttgart

Strohfelder® Platinum Original is made from 100% pure wheat straw, which makes it a very nature-friendly bedding solution, as Platinum Original leaves the smallest ecological footprint compared to other litters, such as peat or wood shavings. **Strohfelder® Platinum Original is soft and virtually dust-free.** It does not need to be watered before use.

By using Platinum Original you will avoid slippery or wet floors in your stable, which in turn will reduce the risks of horses' injuries. **No slippery floors mean no joint injuries or other damage to your horses.**

Platinum Original is one of the most popular bedding choices among our clients, because it is very easily handled and requires less efforts in application and cleaning.

Platinum Original improves the heat insulation of the floor, which **considerably reduces the risk of your horses getting cold or stretching their muscles.** Perfectly shaped particles and their size of Platinum Original ensure that even the greedy horses will not eat the litter.

Platinum Original will not cause allergies to your horse, unlike other beddings, such as wood shavings, because there is absolutely no gum turpentine in Platinum Original, which could hurt the eyes of your animals and irritate their respiratory tract.

Platinum Original eliminates ammonia and absorbs its odour, providing greatly improved and fresh climate in your stables. Also, Platinum Original saves your time, because **considerably less time and effort** is required for spreading, cleaning or removing Platinum Original compared to other old-fashioned beddings. Naturally, the amount of waste will be reduced significantly. Used Strohfelder® Platinum Original decomposes in 2-3 months, making it an excellent fertilizer for the fields, orchards, meadows, or as an excellent raw material for biogas plants.

You will no longer need to rip, chop or kick your frozen bedding before its use, as Platinum Original **never freezes and is always ready for use.** Remember, that **your horses will be healthier and happier if you give them the opportunity to enjoy the advantages of Platinum Original bedding.** And even more importantly, **if you change your old-fashioned bedding to Platinum Original, you will save not only your time, but your money as well!**

- * DUST-FREE
- * HEAT-TREATED AT 120°C
- * ABSORBS MORE THAN 400% OF MOISTURE
- * ELIMINATES AMMONIA ODOUR
- * NEEDS LESS STORAGE SPACE
- * SAVES TIME AND MONEY
- * AUSTRIAN QUALITY

1. Move out old beddings and completely clean stall.

2. Do not worry about the wet floor after cleaning - Strohfelder® beddings will absorb left overs what other beddings couldn't handle.

3. Open bedding bags and spill them out to one side of stall. (empty paper bags could be burned or added to recycling)

4. Spread bedding evenly, about 4-6 cm thick layer

* Daily clean out manure and wet spots only

* Add fresh bedding if needed, spread it evenly

* We are recommending changing completely whole bedding every 6-8 months

THERE IS NO NEED TO IRRIGATE STROHFELDER® BEDDING BEFORE USE
